5. RESEARCH PLAN AND SCIENTIFIC SUPERVISORS OF THE SCHOLARSHIPS

The work plan offers a unique opportunity to further enhance a methodological approach that adds to the traditional scope of Design. In recent years, the scholarly landscape has witnessed an unprecedented surge in research focused on archives and preservation. This surge presents a unique opportunity for the multidisciplinary lens of design studies to make a substantial contribution. The proposed research plan aims to conduct an extensive contextual analysis, delving deep into the intricacies of archives. This analytical endeavor seeks to facilitate access to the wealth embedded within archives, elucidating the anticipated interpretations, and highlighting the significance of archival research and practice in both individual and collective endeavors aimed at safeguarding the future of under-explored histories and their ephemera.

The research methodology will embrace a hybrid approach, merging theoretical frameworks with applied research. Notably, the fieldwork will extend beyond traditional boundaries, engaging communities of citizens. This intersection of methods, blending theoretical and applied research, will provide a comprehensive understanding of archives' roles in preserving and narrating historical narratives. The overarching goal is to bridge the gap between individual and institutional efforts, creating a cohesive strategy to secure the future of historical records.

From a social sciences perspective, the research will pose critical questions surrounding the functions of memory and archives in the present moment. This inquiry challenges various sectors to reflect on the collective responsibility of reimagining the utilization of individual and institutional archives. The collaborative effort aims to not only preserve historical artifacts but also to actively shape a narrative that fosters a nuanced understanding of our past. By involving communities in the research process, the project aspires to democratize access to historical knowledge and inspire a collective reevaluation of the societal importance of archives. This research plan thus endeavors to contribute significantly to the evolving discourse on archives and preservation within the dynamic framework of design studies.

The work plan will be guided by Professor Jorge Brandão Pereira, from the ID+ of the School of Design of the Polytechnic University of Cávado and Ave; Professor Cristiana Serejo, from the ID+ of the School of Design of the Polytechnic University of Cávado and Ave and Professor Johanna Archbold, from the Technological University of the Shannon.
